

KONAN KAN JULIUS SETH KADMIEL

CYBERSECURITY TECHNICIAN AND WEB DEVELOPER

PROFIL

I am a young technician in cybersecurity and web development. I have a solid understanding of the basic principles of cybersecurity and web development, as well as practical experience in implementing security and web development solutions. I am capable of working in a team and communicating effectively with stakeholders to ensure the security and stability of web applications.

PROFESSIONAL EXPERIENCE

ICA SECURITY 08-2022 until to day

A START-UP THAT OPERATES IN THE FIELD OF WEB AND IT INFRASTRUCTURE CREATION AND MANAGEMENT.

As a co-founder of ICA Security, I have had the opportunity to train individuals on security and best practices to have when on the internet as well as in the workplace. I had various tasks throughout this training.

- I had to give a brief demonstration of intrusion on operating systems in order to show vulnerabilities and raise awareness on ways to protect oneself even without being an expert in the field.
- I had to demonstrate the threats associated with malware as well as the necessity of installing an antivirus, and also show how to test if one's antivirus is functional or not.
- I had to perform a MITM attack to demonstrate the need to secure both wired and Wi-Fi networks, and show best practices in configuring a router.

https://www.facebook.com/profile.php?id=100083387370228&sk=friends_likes

Our company has also had contracts in the field of web development, website maintenance, and security management. I am a project manager in the design of an E-commerce web application.

Technologies used:

- Wordpress
- wo-commerce
- hostigreur
- site link: <https://lyyyshop.com/>

ORANGE CI 02-2022 to 04-2022

ORANGE IS THE LEADER OR SECOND TELECOM OPERATOR IN 75% OF THE EUROPEAN COUNTRIES WHERE IT IS IMPLEMENTED, AND IN 83% OF THE COUNTRIES IN AFRICA AND THE MIDDLE EAST.

I worked at ORANGE as a telecommunications network technician for the deployment of fiber optic infrastructure in my country. My tasks, more specifically, consisted of the following:

- To connect a branching point within a building (building cabling) to the termination point, in order to provide residents of the building access to fiber.
- To connect a branching point to an optical terminal socket, that is, to provide fiber access directly to a subscriber.
- I also had the opportunity to train interns once again, leveraging my expertise and ability to provide simple but comprehensive explanations.

BUG-BOUNTY HUNTER until to day

BUG HUNTING PROGRAM ON WEB APPLICATIONS USED DAILY BY THOUSANDS OF PEOPLE SUCH AS SPOTIFY, TINDER, ETC... THIS IS MADE POSSIBLE THANKS TO YESWEHACK, WHICH IS ONE OF THE PLATFORMS ENABLING THESE TESTS ON THESE APPS.

I started doing this less than a month ago in order to improve my web pentesting skills and develop brand new skills. Technologies used:

- Metasploit
- Burp-suit community
- nessus
- nmap
- langages de programation(js, php, python)
